Implementing Cisco Application Centric Infrastructure–Advanced (DCACIA) V1.2

Course Duration

5 Days

Course Price

\$4,495.00

45 CLCs

Methods of Delivery

In-Person ILT

Virtual ILT

Onsite ILT

About this Class

The Implementing Cisco Application Centric Infrastructure–Advanced (DCACIA) training shows you how to integrate the capabilities of the Cisco® Nexus® 9000 Series Switches in Cisco Application Centric Infrastructure (Cisco ACI®) mode. You will learn how to configure and manage Cisco Nexus 9000 Series Switches in ACI mode providing enhanced management and policy framework, along with the protocols used in the underlying fabric. The course also covers how to use Cisco ACI as a policy-driven solution that integrates software and hardware, and how to implement Cisco ACI Multi-Pod and Multi-Site deployments. You will gain hands-on practice implementing advanced ACI capabilities such as Rogue Endpoint Feature, Transit Routing, VRF Route Leaking, Contracts and Zoning Rules, Policy Based Redirect to Layer 4–7 Service Node, Multi-Pod Fabric and Cisco ACI® Multi-Site Orchestrator.

Implementing Cisco Application Centric Infrastructure-Advanced (DCACIA) V1.2

How you will benefit

This class will help you:

- Gain the skills and hands-on practice integrating the enhanced, automated capabilities of Cisco Nexus 9000 Series Switches in ACI mode for quicker application deployment
- Get the knowledge for protocols, solutions and designs to acquire professional-level and expert-level data center job roles
- Earn 40 CE credits toward recertification

Why Attend with Current Technologies CLC

- Our Instructors are the top 10% rated by Cisco
- Our Lab has a dedicated 1 Gig Fiber Connection for our Labs
- Our Labs run up to Date Code for all our courses

Implementing Cisco Application Centric Infrastructure–Advanced (DCACIA) V1.2

Who Should Attend

The job roles best suited to the material in this course are:

- Network Designers
- Network Administrators
- Network Engineers
- Systems Engineers
- Data Center Engineers
- Consulting Systems Engineers
- Technical Solutions Architects
- Cisco Integrators/Partners
- Field Engineers
- Server Administrators
- Network Managers
- Storage Administrators
- Cisco Integrators and Partners

Objectives

After taking this course, you should be able to:

- Describe Cisco ACI Fabric Infrastructure and basic Cisco ACI concepts
- Describe Cisco ACI policy model logical constructs
- Describe Cisco ACI basic packet forwarding
- Describe external network connectivity
- Describe VMM Integration
- Describe Layer 4 to Layer 7 integrations
- Explain Cisco ACI management features

Implementing Cisco Application Centric Infrastructure-Advanced (DCACIA) V1.2

Course Outline

Module 1: Describing Cisco ACI Advanced Packet Forwarding

Module 2: Using Advanced Cisco ACI Policy and Tenant Configuration

Module 3: Implementing Traditional Network in Cisco ACI

Module 4: Describing Cisco ACI Service Graph PBR

Module 5: Describing Cisco ACI Multi-Pod Deployment

Module 6: Describing Cisco ACI Multi-Site Deployment

Implementing Cisco Application Centric Infrastructure-Advanced (DCACIA) V1.2

Lab Outline

- **Lab 1:** Examine Local and Remote Endpoint Learning
- **Lab 2:** Verify Bounce Entries
- **Lab 3:** Validate IP Learning
- **Lab 4:** Mitigate IP and MAC Flapping with the Rogue Endpoint Feature
- **Lab 5:** Enable Transit Routing
- **Lab 6:** Implement VRF Route Leaking
